

SIGNAL STATIONS ON NANTUCKET ISLAND.

APRIL 15, 1884.—Referred to the Committee on Appropriations and ordered to be printed.

Mr. C. O'NEILL, from the Committee on Commerce, submitted the following

REPORT:

[To accompany bill H. R. 3890.]

The Committee on Commerce, to whom was referred the bill (H. R. 3890) to establish signal stations on the island of Nantucket, &c., respectfully submit the following report:

Your committee has considered favorably the bill (H. R. 3890) "to establish signal stations upon the island of Nantucket and submarine telegraphic communication with the mainland," and recommend its reference to the Committee on Appropriations, and that said Committee on Appropriations report to the House for the purposes of the bill a sum not exceeding \$40,000 instead of \$15,000; the latter sum being considered by the Committee on Commerce entirely inadequate for the construction of this most necessary line of cable communication and the signal stations.
